Professional Summary

Full-Stack Developer with hands-on experience building responsive web applications and production-grade REST APIs using Vue.js, Node.js, Express.js, and MongoDB. Proven ability to implement JWT authentication, role-based authorization, MVC architecture, and CRUD operations. Delivered projects including a doctor booking platform and an e-commerce API with secure integrations. Strong collaborator with experience in Agile environments and client-server architecture.

Technical Skills

Frontend: Vue.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Design

Backend: Node.js, Express.js, REST API Development, JWT Authentication & Authorization, MVC Architecture, CRUD Operations

Databases: MongoDB, Mongoose, SQL, Relational Database Concepts

Tools & DevOps: Git, GitHub, Postman, npm

AI / ML: Python, Machine Learning, XGBoost, scikit-learn

Methodologies: Agile, Waterfall, Code Review

Languages: Arabic (Native), English (Fluent)

Professional Experience

Front-End Developer Trainee – ITI (Vue.js Track)

Aug 2025 – Present

Information Technology Institute (ITI) | New Capital, Egypt

- Develop and maintain responsive single-page applications (SPAs) using Vue.js and modern frontend tooling.
- Integrate RESTful APIs, manage application state, and optimize performance to improve user experience.
- Apply accessibility standards, testing practices, and code-quality best practices in Agile team settings.
- Delivered project work including the Backend E-commerce API and Anubis Gym Management System.

Front-End Developer Trainee – ITI (Web Development Track)

Jul 2024 – Jan 2025

Information Technology Institute (ITI) | Aswan, Egypt

- Built responsive web pages using HTML, CSS, and JavaScript, translating UI requirements into reusable components.
- Integrated REST APIs and handled client-side data flow to support dynamic pages and form-driven interactions.
- Contributed to the MedLink doctor booking application by implementing responsive search, availability, and booking flows.
- Strengthened problem-solving and teamwork skills through peer collaboration and hands-on development projects.

Projects

MedLink – Doctor Booking Application

- Designed and implemented a responsive Vue.js single-page application enabling patients to search, filter, and book doctors.
- Built real-time availability views, calendar sync, and client-side validation using REST API consumption.
- Developed booking endpoints and integrated dynamic filtering for specialty, location, and schedule.

Technologies: Vue.js, REST APIs, HTML, CSS, JavaScript

Backend E-Commerce API

- Developed a production-style REST API using Node.js and Express.js following clean MVC architecture.
- Implemented JWT-based authentication, role-based authorization, and secure password hashing.
- Built full CRUD operations for users, products, and orders with MongoDB/Mongoose and centralized error handling.
- Documented and tested all endpoints using a Postman collection; integrated secure file upload functionality.

Technologies: Node.js, Express.js, MongoDB, Mongoose, JWT, Postman

Anubis Gym Management System

- Built a modular web platform to manage memberships, subscriptions, payments, schedules, and access permissions.
- Implemented admin dashboards and role-based access control to streamline gym operations.
- Developed automated billing and reporting workflows to digitize day-to-day management tasks.

Technologies: Vue.js, Node.js, Express.js, MongoDB

Diabetes Prediction AI Model

- Implemented an end-to-end ML pipeline using the PIMA Indians dataset with exploratory data analysis and preprocessing.
- Applied class-imbalance handling and XGBoost training with hyperparameter tuning, achieving optimized model performance.
- Deployed the trained model via an API endpoint for real-time diabetes risk prediction.

Technologies: Python, XGBoost, scikit-learn, REST API

Education

Bachelor of Science in Computer Science

Expected Jun 2026

Arab Academy for Science, Technology & Maritime Transport – Faculty of Computer & Information Technology, Egypt
