PROFESSIONAL SUMMARY

Software Engineer and Full-Stack Developer with a B.Sc. in Computer Science specializing in Software Engineering. Experienced in requirements analysis, system design, and building maintainable, secure REST APIs using clean MVC architecture and OOP principles. Skilled in API testing, debugging, database design, authentication, authorization, and secure development practices. Comfortable adapting to new tools and frameworks and collaborating effectively within Agile/Scrum teams through code reviews and sprint planning.

SKILLS

Software Engineering: Requirements Analysis, System Design, OOP, SOLID Principles, Design Patterns, Data Structures & Algorithms, Clean Architecture, MVC

Development: JavaScript (ES6+), Python, SQL, Node.js, Express.js, Vue.js, REST APIs

Software Quality: Unit & API Testing, Debugging, Error Handling, Code Reviews, Validation, Troubleshooting

Security: Authentication, Authorization, RBAC, JWT, Password Hashing, Secure API Design, Input Validation

Databases: MongoDB, Mongoose, SQL, Relational Database Design

Tools & Practices: Git, GitHub, Postman, Jira, Agile/Scrum, Sprint Planning, npm, VS Code, AWS

Languages: Arabic, English

EXPERIENCE

Front-End Developer Trainee — ITI (Vue.js Track) Aug 2025 – Oct 2025

Information Technology Institute (ITI) | New Capital, Egypt

- Integrated 15+ RESTful API endpoints and managed application state, reducing redundant network calls and improving perceived performance.
- Applied accessibility standards, testing practices, and code-quality reviews within Agile sprints, collaborating with 10+ peer developers.
- Delivered production-style full-stack projects from design through deployment, applying clean MVC architecture and REST API integration.

Front-End Developer Trainee — ITI (Web Development Track) Jul 2024 – Jan 2025

Information Technology Institute (ITI) | Aswan, Egypt

- Built 10+ responsive web pages and reusable UI components using HTML, CSS, and JavaScript, translating design requirements into functional interfaces.
- Integrated REST APIs to support dynamic, form-driven interactions, improving client-side data handling across multiple pages.
- Contributed to a doctor-booking application, implementing responsive search, availability, and booking flows.
- Enhanced problem-solving and teamwork abilities through 5+ collaborative software development projects with peer developers.

PROJECTS

FEATURED PROJECT

K&M E-Commerce Multi-Vendor *Node.js, Express.js, MongoDB, Mongoose, JWT, Postman*

- Designed a modular RESTful API for a multi-vendor commerce platform using clean MVC architecture and separated business logic.
- Implemented authentication and authorization with JWT, refresh-token workflows, RBAC, secure password hashing, and protected routes.
- Developed core commerce modules including users, vendors, products, carts, orders, reviews, coupons, and order-status workflows.
- Applied validation, centralized error handling, pagination, filtering, sorting, search, secure file uploads, and defensive programming for maintainable APIs.
- Organized and tested API routes with Postman, including reusable test flows and documentation for development and verification.

MedLink — Doctor Booking Application *Vue.js, REST APIs, HTML, CSS, JavaScript*

- Designed and built a responsive Vue.js single-page application enabling patients to search, filter, and book doctors across multiple specialties.
- Implemented real-time availability views and calendar sync, streamlining the end-to-end booking flow for users.
- Consumed REST APIs with client-side validation to support dynamic filtering by specialty, location, and schedule.

Anubis Gym Management System *Vue.js, Node.js, Express.js, MongoDB*

- Built a modular web platform to manage memberships, subscriptions, payments, schedules, and access permissions.
- Implemented admin dashboards and role-based access control (RBAC) to streamline day-to-day gym operations.
- Developed automated billing and reporting workflows, digitizing previously manual administrative tasks.

Savora Admin Dashboard *Vue.js, Node.js, Express.js, MongoDB, REST APIs, JWT, RBAC*

- Developed a responsive admin dashboard to manage users, chefs, orders, menus, and transactions.
- Integrated REST APIs with secure JWT authentication and role-based access control (RBAC).
- Built reusable Vue.js components and optimized the dashboard for efficient platform management.
- Collaborated in an Agile team using Scrum methodology and Jira for sprint planning, task tracking, and project management.

EDUCATION

Bachelor of Science in Computer Science — Software Engineering 2026

Arab Academy for Science, Technology & Maritime Transport — Faculty of Computer & Information Technology, Egypt
